Bayo Inc.

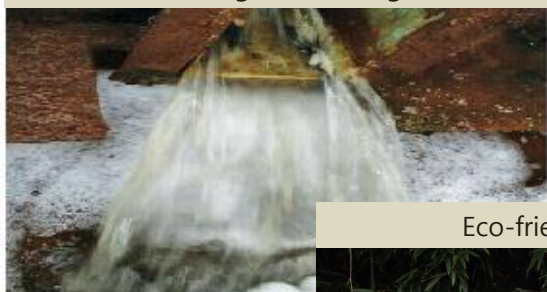

About Bayo Inc.

When nature recovers, people's lives recover as well.

Bayo Incorporated seeks to become an eco-friendly general bio company in the 21st century. We have a patented strain of CES-1. To solve the fundamental issue of the environment problems, we work to fulfill our duty to restore nature, which was endowed by God.

Especially, by operating a variety of projects on eco-friendly sewerage processing (improvement of water quality, sludge and odor reduction); purification of rivers and lakes, and fish farms; agriculture and stockbreeding; soil improvement; eco-friendly products (home EM, natural soap, natural deodorant, water purifier for aquariums), we promise to take a vanguard role in restoration of the environment.

CES Multi-purpose Home Enzyme Undiluted Solution

Protect your family and the environment from harmful chemicals and germs!

CES, our patented natural fermented enzyme which was developed domestically, contains as many as 330 types of effective microorganisms, strongly removing odors, purifying water and promoting antioxidants by eliminating harmful germs.

EM? It is an acronym for effective microorganism which is a combined and cultivated compound of microorganisms that are beneficial for people such as lactobacillus, yeast fungus and actinobacteria.

CES multipurpose home EM undiluted solution, developed with our special culture method, alleviates EM's unique odor and color, allowing it to be easily applied in homes without worries about odor or color stains. This solution is ready to use upon dilution with water without additional rice water fermentation. In addition, having been fermented with apples, a fresh apple fragrance is added to it.

CES multipurpose home EM undiluted solution is not harmful to body and is a safe natural product without any harmful chemical ingredients.

CES Multi-purpose Home EM Undiluted Solution

We think of convenience and the environment

To make home uses easy, we used a typical detergent case and the lid can be used as a measuring cup, useful when diluting. Used up case can be recycled for dilution purpose of detergent and EM on a 1:1 ratio.

Retail price

1L : 8,000 KRW

2 L : 15,000 KRW

Uses of EM Undiluted Solution

EM Undiluted solution is effective at cleaning rooms, living rooms, bathrooms and kitchens, and removing odor and fungus. When diluted with a detergent, the solution is quite useful for doing the dishes and laundry. Not only does it work as a fabric deodorant for bedding and apparel, but it also works as an antiseptic, mite exterminator and sick house syndrome reliever.

Refer to the dilution ratio below and dilute with purified water coupled with a sprayer or use directly on rinsing water.

Cleaner

Rooms/Living rooms: x50
Bathroom: x10

Deodorant

Food waste, closet, shoe rack
x10

Mite Exterminator

Fabrics like bedding, carpets, apparels
x20

Detergent

Laundry, kitchen, shampoo, body cleanser
1:1 with detergent

Antiseptic

Cutting board, dishcloth, fruits and vegetables
x10

Sick House Syndrome Reliever

Wallpaper, paint, floor and furniture
Do not dilute

Oil Remover

Gas stoves, range hoods, etc
Do not dilute

For Pets

Deodorant or substitute for conditioner
x50

For Bath

Bathing / mouthwash
x50

For Foot bath

Athlete's foot relief
Do not dilute

※ The above dilution ratios indicate the recommended dilution ratios. Adjust the levels depending on the degree of contamination. However, the product is completely safe regardless of the dilution rate.

CES Zone - EM Natural Deodorant

Multi-purpose EM natural deodorant, CES Zone No chemicals, No preservatives, No artificial scent, No surfactant

Internally developed and produced CES natural fermented enzymes and natural essential oils not only remove odors but also exterminate harmful germs, which are the fundamental causes of:

- Bathroom odors and dangerous germs!
- Kitchen smells from food waste and sewerage!
- Smells from apparels and shoes that can't be washed often!
- Dirt and grime in car interiors and air conditioners that are hard to clean and maintain!
- Sick house syndrome, the cause of a myriad of skin illnesses such as atopic dermatitis!

Spray generously on areas that smell and on wallpaper of a new house!
CES natural fermented enzyme's EM not only removes harmful germs causing sick house syndrome but its anti-oxidant function persists so clothes and furniture last longer.

CES Natural Aged Soap - Premium Soap

KC
Certified

Wash your face with our healthy, chemical-free soap!
“No preservatives, No artificial coloring or scent, No surfactant, No hardener.”

Our 100% handmade natural soap - aged more than a month - is made with internally developed and produced CES natural fermented enzyme (EM) and a variety of natural ingredients such as pure plant oils, natural essential oils and natural powder. The aging process allows the soap to be mild and moisturizing for sensitive skin. In addition, the natural fermented enzyme's EM improves the skin by cleansing, removing dead skin cells, moisturizing and even helping anti-oxidative activity.
※ Aged soaps require at least a month of aging (baby/atopy soaps require more than six weeks), so make sure to contact six weeks prior when ordering large volumes.

CES Beauty Soap

Face & body cleanser

11,000 KRW

The soap is handmade by being aged at a low temperature and uses only enzyme powder made by fermenting rice bran, wheat germ, seaweed and chlorella, which helps skin moisturizing, whitening and trouble relief, and 20 other edible natural ingredients as well as CES natural fermented enzyme, plant oils and natural essential oils.

Main ingredients : CES natural fermented enzyme, CES enzyme powder, olive oil, palm oil, coconut oil, grape seed oil, lavender essential oil

CES Handsome man Soap

All in one
cleanser

11,000 KRW

The soap is handmade by being aged at a low temperature and uses only oriental medicine enzyme powder which helps hair & scalp health as well as CES natural fermented enzyme, plant oils and natural essential oils. The convenient all in one soap is available from head to foot instead of face & body cleanser

Main ingredients : CES natural fermented enzyme, oriental medicine enzyme powder, olive oil, palm oil, coconut oil, grape seed oil, tea tree essential oil

Mild Baby Soap

Baby shampoo & body wash

13,000 KRW

To help cleanse and moisturize delicate baby skin, we present our premium handmade soap made through more than six weeks of aging. With the organic natural fermented enzyme (EM) being the main ingredient, it is made with only plant oils such as olive oil, hempseed oil, jojoba oil and natural essential oils. It's also perfect for people of all ages with sensitive skin.

Main ingredients : CES natural fermented enzyme, olive oil, palm oil, coconut oil, hempseed oil, lavender essential oil

Mild Atopic Soap

Face & body cleanser

13,000 KRW

The product is a premium handmade soap made through over six weeks of aging using plant oils that are effective at relieving itchy and dry skin. We recommend this for people of all ages with sensitive and dry skin.

Main ingredients : CES natural fermented enzyme, olive oil, palm oil, coconut oil, evening primrose oil, jojoba oil

CES Enzyme Soap

Face & body cleanser

KC
Certified

No Preservatives, No artificial coloring, No artificial scent and No hardeners”

This handmade enzyme soap is mainly made of shea butter added to a TEA-free premium soap base and handmade organic natural fermented enzyme along with other natural ingredients including plant oils, natural powder and natural essential oils. The natural fermented enzyme, EM, helps clean and moisturize skin, remove dead skin cells, and even deliver anti-oxidization.

※ Production of enzyme soap requires a short time. Bulk orders are welcome.

Heartleaf Soap

4,500 KRW

Heartleaf excels at antiseptic and detoxification properties - it significantly promotes heavy metal detoxification, capillary vessel protection, and virus and skin disease improvement. It also helps relieve itchiness from dry skin while improving blood circulation. Its dry leaves are often used as tea.

Main Ingredients : Shea butter added TEA-free premium soap base, CES natural fermented enzyme, glycerin, natural sulfur, heartleaf powder, tea tree essential oil

Calamine Soap

4,500 KRW

As calamine powder, one of the ingredients of chicken pox cure, contains zinc oxide, which is anti-inflammatory and protective, this soap works well for sensitive skin, acne skin and sunburned skin for a fresh skin condition. It also relieves skin with dryness, itchiness, heat rash or other troubles.

Main Ingredients : Shea butter added TEA-free premium soap base, CES natural fermented enzyme, glycerin, natural sulfur, evening primrose oil, calamine powder, lavender essential oil, grapefruit essential oil

Green Bamboo Soap

4,500 KRW

Green bamboo, also known as “Jjok,” has been used as a natural dye. It is excellent in detoxification with an antibacterial effect, kills S.aureus, which causes acne and other skin diseases, and helps remove sebum from oily skin and relieve skin.

Main Ingredients : Shea butter added TEA-free premium soap base, CES natural fermented enzyme, glycerin, natural sulfur, green bamboo powder, tea tree essential oil

Dried Tangerine Peel Soap

4,500 KRW

Dried tangerine peel has four times the amount of vitamin C found in the flesh. Limonene, a type of oil compound, gently forms a thin protective layer over the skin to retain vital moisture. Perfect for dry and itchy skin, and trouble relief.

Main Ingredients : Shea butter added TEA-free premium soap base, CES natural fermented enzyme, glycerin, natural sulfur, white jojoba oil, dried tangerine peel powder, sweet orange essential oil

Paprika Soap

4,500 KRW

Paprika is a great source of vitamin C and beta-carotene which builds strong cells and improves immunity. Paprika harvested in the summer is especially helpful in facilitating melanin metabolism, which improves skin troubles like freckles and rashes.

Main Ingredients : Shea butter added TEA-free premium soap base, CES natural fermented enzyme, glycerin, natural sulfur, white jojoba oil, paprika powder, sweet orange essential oil, lavender essential oil

CES153 - Aquarium Enzyme

This chemical-free natural fermented enzyme helps with healthy and easy aquarium maintenance.

CES aquarium natural fermented enzyme EM improves water purity, reduces odor, restores water clarity and overall quality, and changes water quality conditions. Its ability to retard the growth of harmful bacteria creates a better environment for aquarium fish to improve their immunity. In addition, it doesn't need frequent water change, leading to easy maintenance of the aquarium.

Retail Price

100ml: 5,000 KRW
4L : 20,000 KRW
(for business use)

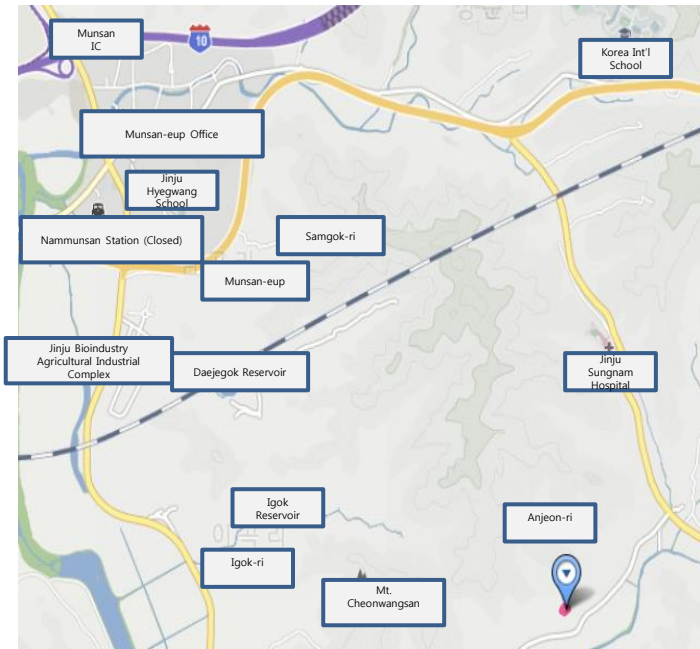

Instructions

- Apply daily for the first three days.
- After the three days, apply once a week.
- After a week, apply once every two weeks.
- When excessive organic matter is present, double the usage amount.
- When water becomes clean, use the normal amount.
- Shake before use.
- Avoid direct exposure to sunlight and store in a cool place.

Representative Strains

- Clostridium: Lignin and cellulose degrading enzyme, protease, dehydrogenase, hydrolase, collagenase
- Lactococcus : starch degrading enzyme, protease, lipolytic enzyme, aminopherase, citric acid synthetase
- Lactobacillus : prevention of harmful bacteria(pathogen) growth, β -Galactosidase, peptide degrading enzyme, ester degrading enzyme, catalase
- Acidocella : effective against acetic acid and degrades aromatic compounds (benzoic acid, phenol, etc), methanol dehydrogenase
- Citrobacter : contributes to reducing nitrate to nitrite
- Burkholderia : degrades chlorinated agricultural pesticides or PCBs which are normally hard to decompose and utilized as a bio-pesticide or growth stimulant
